ANTI-CINCH COMFORT SEAT BELT WITH IGNITION ISOLATION SWITCH

1-2592-26-C

These retractable seat belts have bright orange webbing to ensure your operators are buckled up. All are 60" in length and conform to all safety specifications. The optional ignition isolation switch feature prevents the truck from starting unless the seatbelt is fastened. Anti-switch seatbelts allow for increased operator maneuverability.

Accu-Tilt

Fork Tilt Level Indicator

Incorrect tilt angle of the forks is the leading cause of both racking and product damage. Even the most experienced operator has difficulty judging the tilt of the forks when he is entering pallets high on the rack. The Accu-Tilt shows the operator the level of the forks at all times thereby reducing potential damage by piercing product or racking and increasing productivity by eliminating the guess work. Additionally, the Accu-Tilt will also indicate to the operator the correct angle to travel with a load as well as parking the lift truck.

- Reduce product damage
- Reduce rack damage
- Reduce pallet damage
- Increase productivity

The Accu-Tilt installs on any counterbalance lift truck in less than one minute without any tools. You will love the benefits of the Accu-Tilt.

Anti-Blind Spot Dome Mirror

Lift truck operators need to know what is going on all around the lift truck. This mirror gives a complete 180° view allowing the operator to give a quick safety check before they travel in reverse. Installs on any lift truck in seconds with 3M two sided tape. Also available with a durable magnetic arm to attach to any metal surface.
