72/48	7	E-7248-C	3,400 lbs.	\$779.00			

Treadplate surfaces ensure skid-resistant safer traction. 11° bend in the plate allows edges to be flush at dock and truck for smooth material transfer. Beveled edges reduce wear and excessive equipment jarring.

Additional sizes available.

Wheel Chock Safety System

Most fatal accidents are a result of trailers not being properly secured. This system requires the truck driver to confirm that the trailer brakes have been applied and the wheels chocked; this is confirmed by his signature that the trailer is safe to enter. Kit comes complete with 20" (H) x 24" (W) sign, clip board, attached pen, forms (can be photocopied) and mounting screws.

Wheel Chock Safety System
ATDS-1-D **\$79⁹⁵**

Compete Wheel Chock Safety System

- System includes:
- Moulded rubber wheel chock
 - 15 foot chain
 - 10" x 14" Sign
 - Bracket
